Pulsed Electromagnetic Field Therapy

Pulsed electromagnetic field (PEMF) therapy re-energizes damaged cells by inducing electrical changes within the cell that restore it to its normal healthy state.

GET REAL RESULTS

- Stress
- Anxiety
- Depression
- Chronic Pain
- Insomnia
- Chest Pain
- Fatigue
- Tension
- Headaches
- Osteoporosis
- Surgery Pain
- Inflammation
- Arthritis
- and more

PEMF Increases the Following:
- Circulation
- Energy to Cells
- Cell Hydration
- Bone Density
- Lean Muscle Mass
- Flexibility
- Range of Motion
- Stamina
- Strength
- Endurance
- Immune System
- Nerve Response
- Muscle Response

PEMF Decreases the Following:
- Pain
- Stiffness
- Swelling
- Inflammation
- Edema
- Spasms
- Stress
- Bruises
- Contusions

Stimulates Tissue Repair
- Decreases Pain
- Increases Endorphin Release
- Increases Availability of Oxygen and Nutrients
- Supports Detoxification of Cells and Organs

Improves Circulation
- Boosts the Immune System
- Reduces Inflammation and Swelling
- Accelerates ATP (Vital Energy) Production
- Enhances Cell Elasticity via Collagen Production

PEMF therapy provides a major energy boost to the cells, thus restoring them to a functional, healthy state. Look at the changes to the cells after only 15 minutes:

White blood cells before PEMF therapy. Note how clumped and small they appear, thus making them unable to uptake nutrients.

White blood cells after PEMF therapy. These cells have returned to normal size and are now able to uptake nutrients and perform proper immune function.

To make an appointment for PEMF with Dr. Martin Bales, please contact Center for New Medicine at (949) 680-1880.

PEMF combined with acupuncture is covered by NGS CoreSource.
